- Timeline
- Students Responsibilities (P1 & P2)
- Extra info to take note

From Handbook

WQF7023 Artificial Intelligence Research Project

Course Learning Outcomes

At the end of this course, students are able to:

1. Design solution using artificial intelligence techniques for real world problems.
2. Develop Artificial Intelligence-based solution formulated on project objectives.
3. Explain solution in oral and written presentation related to artificial intelligence research.

Synopsis of Course Content

A research project is a medium-scale project to enable students to do research related to artificial intelligence. Research projects allow students to use actual data from industry partners or public data to create applications by applying knowledge in the basic, theories and scientific methods to solve problems related to artificial intelligence. During the project, students will engage in the overall process of general research, starting with identifying problems, collecting and processing data, recommending solution methods, applying appropriate scientific methods and ending with implementing affordable solutions and evaluations. At the end of the course, students are required to submit a project report and perform a project presentation.

Evaluation and Weightage

Continuous Assessment	: 100%
Final Examination	: 0%

Course Prerequisite: WOX7001

Serving the Nation. Impacting the World.

WQF7023 AI RESEARCH PROJECT

Consists of 2 semesters:

- P1 and P2
- Must be continuous, i.e.
 - Sem 1 = P1, Sem 2 = P2 or
 - Sem 2=P1, Special sem = P2 or
 - Special sem = P1, Sem 1 = P2
- Research Project Title
 - From the list or
 - Propose your own topic (look for supervisors)

Register Research Project

- Fill in *Form Of Appointment Of Supervisor And Confirmation Of Title For Research Project*

<https://fsktm.um.edu.my/forms-and-templates>

- Submit the following documents to a google form link (Refer to Timeline pdf)
 - Supervisor Appointment Form
 - Research Intent (Proposal)

FORMS & TEMPLATE

Registration of Dissertation/Research Project

- > Masters by Coursework and Dissertation (1)
- > Masters by Coursework (2)

Submission of Dissertation/Thesis

- > Submission of Thesis/Dissertation for Examination/Re-examination Form (1)
- > Final Submission of Thesis/Dissertation (2)
- > Thesis/Dissertation Correction Form (3)
- > Repository Form (4)

Appeal to Extend Maximum Period of Candidature

Change of Supervisor / Co-Supervisor / Field of Research

What should be in the research intent (proposal)?

- A document with less than 5 pages
 - Introduction
 - Literature Review (Problem Statements)
 - Research Objectives & Questions
 - Methodology
 - References
- Format:
 - Header with your name and matric number
 - Font: Times News Roman, 12pt
 - Single spacing

MAI Project (P1) – 40%

- 20% Report + 20% Presentation
- Content of report and presentation :
 - Chapter 1: Introduction
 - Chapter 2: Research Problem
 - Chapter 3: Research Objectives
 - Chapter 4: Literature Review
 - Chapter 5: Research Design/Methodology
 - References
- Report: Use template available in website
- Presentation: 10 minutes presentation, 5 minutes QnA.

GUIDELINES AND POLICIES

No.1	Guidelines of Preparation of Research Project, Dissertation and Thesis - Senat 23.05.2024
No.2	
No.3	
No.4	> Thesis/Dissertation (MS Word Template)
No.5	> APA Formatting and Style Guide
No.6	> Original Literary Work Declaration
	> Minimum and Maximum Word Limit (Research Project, Dissertation and Thesis)

<https://fsktm.um.edu.my/guidelines-and-policies>

MAI Project (P1) – 40%

P1 Presentation:

- Refer to timeline
- Discuss with supervisors

Report Submission:

Refer to the website

<https://fsktm.um.edu.my/research-research-project-dissertation>

MAI Project (P2) – 60%

- 40% Report + 20% Presentation
- Content of report and presentation :
 - Chapter 1-5: Introduction - Methodology
 - Chapter 6: Results
 - Chapter 7: Discussion + Limitation
 - Chapter 8: Conclusion + Future Work
 - References
- Report: Use template available in website
- Presentation: 15 minutes presentation, 15 minutes QnA.

Extra info to take note:

- Students MUST apply the technical skills and knowledge learned from the MAI courses in the project
- Be realistic of your project scope
 - Discuss with supervisors so that it is feasible to be completed in 2 semesters.

Extra info to take note:

- Do's :
 - On Dataset: Basic datasets such as Kaggle/UCL Dataset can be used only with valid reason (e.g.: no other open dataset available in the domain)
 - For development and Implementation, DO NOT use tools only (ex: WEKA, SAP, SAS), MUST include some programming or STATISTICAL ANALYSIS (e.g.: survey and analysis)
- Don'ts:
 - Do not use private data (e.g. from your company) without getting prior written approval; refer to University of Malaya Research Ethics Committee (UMREC) - <https://umresearch.um.edu.my/research-ethics/>

Thank you
